Preparations for Improved Stage Lines to Custer City.

They are Zealously Guarded by the Miners.

Valuable Hints to Purchasers Fire-Arms.

Henry Homan, of Omaha, Strikes Sich Bonanza-It is a Rich Quartz Lead, and He Now Has Twelve Men

To Work It.

Custer City, Dakata, January 4 -

The stage companies are waking up to the important fact that this town is to be of considerable importance in the near future. The Cheyenne line will put a complete outfit on he new toll road from th's place to Harney, on North Battle creek, in about two weeks. The line will be gradually extended until it takes in the town of Hayward and also the lower town of Battle City. The upper towns are growing rapidly and

cities in a short time. About one mile from Hayward, over to the southwest, a fine gold lode has been discovered, which prospects extremely rich. It carries free gold in a white looking rock, which resembles the Centennial ore from near Laramie. It is somewhat harder, but would work very well with the proper machinery. The miners are rocking out enough gold to live on and guarding their claims very jealously indeed. Over twenty-eight miles of ground has been taken up, and the men who came in too late are watching for the slightest excuse to "jump" the claims. Most of the cabins are perfect arsenals, and I have counted as high as ten guns in one camp. The Springfield needle guns and the heavy Sharp's rifles, with globe sight forward, and the Creedmoor peep sight screwed into the stock. are the favorite guns. The Winchester repeater is a good gun for the timber, and for hitting anything within six hundred yards, but there is not enough powder in the cart-ridge to hold the ball up for a greater distance than that. To parties coming up to the Hills, I would say, get a good beavy Sharp's rifle, by all means, for they are always in demand, and can be sold, if well kept, vithout much loss to the owner The Indians down on the stage lines ully appreciate the qualities of the different guns, and govern themselves accordingly. Speaking of Indians reminds me of an incident that occurred while we were over at Iron creek. The readers of the BEE will doubtless remember the killing of four men who were take at least one vote, until a senamaking hay about two miles south of Custer last July. THE U. S. LAW PROVIDING POR

THE ELECTION OF A SENATOR. As we are on the eve of an election of United States Senator in this State, some description of the modus operandi will be of interest to the public. THE COAL TRADE.

Reputed B. ewal of the Combina tion-The Lacts in the Matter. New York Daily Bulletin.

It has been stated for some days past that the various coal-producing companies are endeavoring to effect a combination, by means of which the production of coal will be limited to the actual demand from consumers. The details of this proposed combination have not been public, but it is understood that the object sought for is to limit the production of coal to the reasonable capacity of each mine, and in this manner to avoid a glutted market, as at present. The com-bination, if formed at all, therefore, will be simply for ton-nage, and will have nothing to do with prices, each company being allowed to obtain best prices they can for their own productions. In relation to this matter, a reporter of the Bulletin on Saturday called upon 600. The ice gorge had been ex- John McCormick, S. C. Abtott, R. form such a combination. Mr. known to be lost Sloan said, however, that the company he represented would have nothing to do with either the one or any other combination, either in regard to tonnege or price. He said further, that he had been drawn into the last combination much against his wishes, and he had enough of it. No consideration would induce him to have anything to do with another combination either directly or indirectly. He said he did not speak in this manner on account of any animus to any of the coal companies, but sim-

ply because as a business principle ne objected to all combination as burtful both to the public and the companies. He wished every success to the coal trade, and to all the companies engaged in it, but he believed the true policy for each company to pursue was to conduct its business in its own way, and obtain the best possible price for its productions, without reference to what any other company was doing. Mr. Sloan denied the report that he had refused to join the combina-tion until the Lehigh Valley Coal company would give security in \$500,000 for the faithful performance of the contract on its higher; No 2, 1 28al 39, closed at part, and even it all the companies were forfeitures for non-performance on the part of all the companies, but none of them had ever been paid, and the various companies owed his company now in that way

over \$67 000, of which he never expected to obtain a penny. Mr. be elected to the United States Sloan con inded by saying that he would have nothing to do with any combination, directly or indirectly, for either tennage or prices, as the whole matter was opposed to sound business principles.

At the office of the Pennsylvania Coal company the reporter was inthe proposed combination favorably, as it was the only way to control the market and prevent the supply of coal exceeding the demand. They did not believe in a combination to control prices, but thought that to control tonnage was sound policy and legitimate. The companies, they said, should work and produce pro rata, according to the amount of coal demanded, and not produce an excess under any circumstances. They did not think the companies separately could carry out such a ystem, as some of them might prefuce too much, and therefore a combination to limit production was the only thing that could rescue the coal trade from its present condition, for now the profits were very small. Of course the combination spoken of would not interiere with prices, as each company would be left to its own judgment as to what price it would sell, according to its facilities and necessities, but probably the prices might go up. Sev. says: One of the bright features of eral companies might remain outside of the combination, but their prices would undoubtedly be con-

trolled by the general market, so that the prices of the combination would became the standard, but then prices would be a mere in

The horse is an animal of nervous organization. His mouth is formed of delicate glands and tlssues. The temperature of the blood the same as the human being, and, as in man, the mouth is the warmest part of the body. Imagine, we repeat, the irritation that would be caused the human, and consider that, if not to the same degree, still the suffering to the animal is very great; and it is not a momentary pain. Food is eaten with great difficulty, and the irritation repeated every day causes loss of appetite and loss of strength. Many a horse has become worthless from no other eause than this. the Tribune, from New Orleans, Gov. Packard's Administration developed itself Saturday, and that is, that the worst element of the Republican party is fast going over to the enemy. Pinchback, who has been for three or four days negotiating the transfer of four Senators to the Nicholis concern, this morning sent word to Gov. Packard that if the latter would remove his objections to the candidature of the former to the United States senate he would i guarantee the presence of a quorum in the senate in two hours. Gov. received with loud and vociferous cheering by the adherents of Nicholls, and the former delivered himself of a similar diatribe on Gov. Packard to that which he administered to President Grant last summer at the Cincinnati Convention. This does not in any way alter the situation, nor will it seriously cripple Packard's Administration, though it leaves the Senate without a quorum. All the important measures, however, have already been passed. It will not be likely to detract from Gov. Packard's reputation that he would not consent to the election of Pinchpack even at the risk of crippling of his Government.

New Orleans, January 15 .-- Mr Pinchback, in explanation of his course Saturday, stated that the action of himself and these Senators was only decided upon after mature deliberation. They intended to stand the hazard of the die. They had come there as Republicans because they believed in the interests of the State above party. He denounced the Republican party of Louisiana in unmeasured terms, and said Hayes, if inaugurated, could not afford to soil his administration with this blight upon the prosperity of the people. He ac cused ex-Governor Kellogg of securing his election as Senator by cor-
